

## Inquiry and Verification Procedures of International Professional Qualification Certificates

**I. Inquiry and verification applications.** Employers can register and log in to the Beijing-Tianjin-Hebei International Professional Qualification Certificate Inquiry and Verification Service Platform (<https://easybeijing-certc.fesco.com.cn>) to submit relevant information on professional qualification certificates and apply for inquiries and verification online.

**II. Online acceptance.** The inquiry and verification service platform will accept eligible inquiry and verification applications and, based on communication with certificate-issuing authorities and other relevant channels, will inform employers online of the expected processing time.

**III. Inquiry and verification results.** The inquiry and verification service platform will provide employers with the inquiry and verification results online. For professional qualification certificates verified as authentic, the platform will generate and display a verification code. Inquiry and verification applicants can

use this code to check the results in the Convenience Service section of the Beijing Municipal Bureau of Human Resources and Social Security website (<http://rsj.beijing.gov.cn>).

**IV. Responsibility confirmation.** The inquiry and verification service platform reserves the right to reject applications from individuals who provide false materials or inaccurate information. The verification results solely confirm the authenticity of the certificates and do not assess the actual qualifications or competency levels of the certificate holders. The platform will not assume any legal responsibility for disputes arising from personnel or labor relations.
